

## Innovation in Water Sustainability

The Creedmoor Maha Water Supply Corporation Board of Directors has taken a monumental step towards securing a sustainable water future by approving a Request for Proposal (RFP) at their June 26, 2024 regular board meeting. The initiative garnered widespread interest, with CMWSC receiving several proposals from esteemed companies, including BIGICO, Seven Seas, and TSG.

Following thorough deliberation, the board of directors announced their selection, solidifying their dedication to providing reliable desalination water within the next 12-24 months.

In a strategic move highlighting the significance of innovative water solutions, CMWSC has selected BGICO, as its partner for negotiations. If all agreements are reached, they will move forward together to combat water scarcity challenges and secure a consistent water supply for the community.

The contract details the installation of desalination infrastructure using BGICO's expertise in sustainable water treatment, expected to boost water production and strengthen CMWSC's supply resilience.

With the projected completion timeline, CMWSC underscores the urgency with which it aims to secure a stable water source for its residents and future growth.

Through this collaboration, CMWSC not only embraces technological innovation but also takes substantial strides towards realizing long-term water sustainability goals.

Desalination, renowned for its effectiveness in generating fresh water from the brackish water, emerges as a viable and sustainable solution for this region grappling with water scarcity.

## Kids Korner

Hey there, my detective friends! Help me fill in the blanks and let's learn about how a water \_\_\_\_\_ helps bring \_\_\_\_\_ to our homes! A water tower is like a giant \_\_\_\_\_ that holds a lot of water. Its job is to keep our \_\_\_\_\_ full. Water is \_\_\_\_\_ up into the tower, and when we turn on our \_\_\_\_\_ at home, the water travels down through \_\_\_\_\_ to reach us. The water tower is like a big helper, making sure we always have \_\_\_\_\_ whenever we need it.

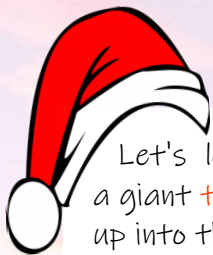

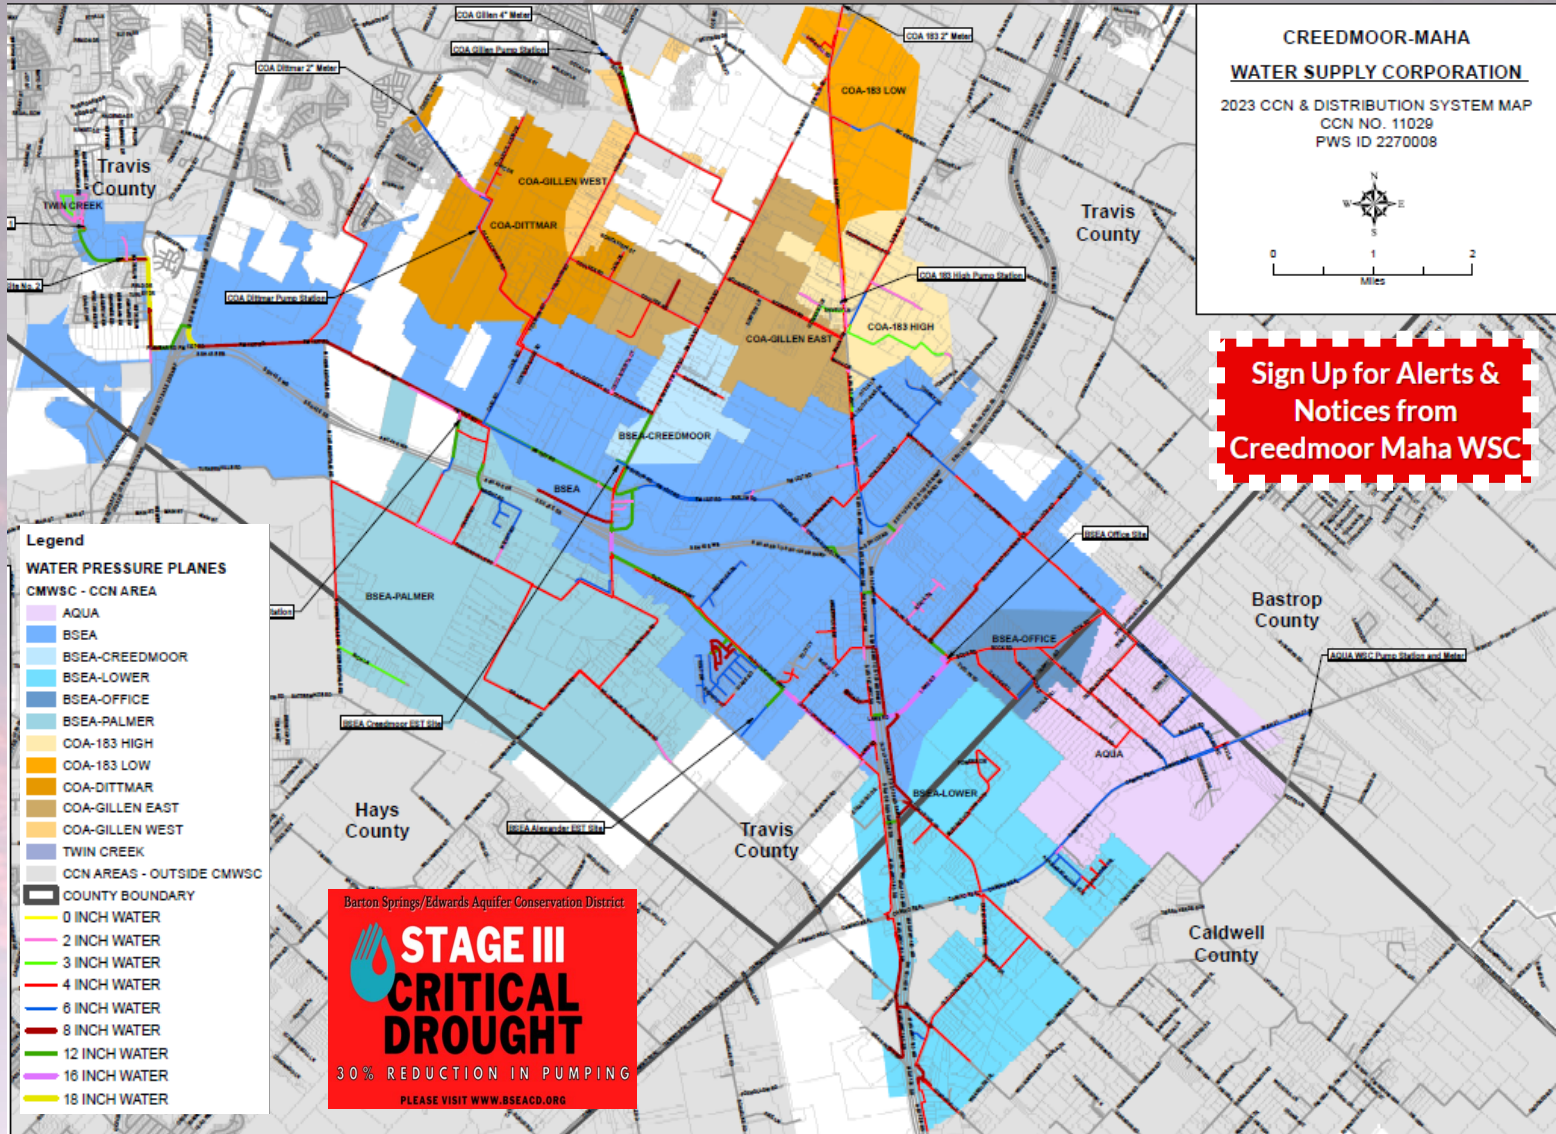

And guess what? Water towers can be \_\_\_\_\_ with fun \_\_\_\_\_ and colors, making them look like giant works of \_\_\_\_\_ in our towns! Next time you see a water tower, remember it's there to keep our faucets \_\_\_\_\_ and our homes \_\_\_\_\_.

[Use the words below to fill in the blanks.]

keep pumped water tank happy homes tower art flowing faucets pipes water designs painted

Let's learn about how a water **towers** helps bring **water** to our homes! A water tower is a giant **tank** that holds a lot of water. Its job is to keep our homes full. Water is **pumped** up into the tower, and when we turn on our **faucets** at home, the water travels down through **pipes** to reach us. The water tower is like a big helper, making sure we always have **water** whenever we need it.

And guess what? Water towers can be **painted** with fun **designs** and colors, making them look like giant works of **art** in our towns! Next time you see a water tower, remember it's there to **keep** our faucets **flowing** and our homes **happy**.
